

Fact file:

Cometa 220 Series

Pric: TBA

- High precision cold hammered barrel.
- Micrometric rear sight.
- Autosafety.
- Adjustable trigger

# Cometa 220 Series

**T**he Cometa 220 is a powerful, accurate and reliable spring powered air rifle. The ergonomic design and high-quality aesthetics make it an ideal air rifle for those looking to do some pest control or plinking.

It's available in three variants, two with a beech stock, the 220 and the 220 Compact, and also with a black synthetic stock as the 220 Galaxy. A rubber butt pad acts as a shock absorber helping prevent strain to your shoulder

and surrounding areas and therefor prolonging your shooting time.

The barrel is cold hammered, giving a super smooth mirrored finish and adding to its hardness. An automatic safety ensures the rifle only shoots when you want it to. The gun also features an adjustable trigger for pressure.

The Cometa 220 spring powered air rifle has an adjustable Micrometric rear

sight helping you achieve accurate shots time after time. The top of the rifle features your standard machine cut dovetail groove allowing optical accessories to be attached. Power is approx 11ft/lbs.

All three models weigh in at 2.8kg and are available in .177 and .22.
